Professional Summary

Software and Systems Developer with 9+ years of experience designing and implementing scalable enterprise applications, APIs, and data-driven systems. Deep expertise in full-stack development, system architecture, and database optimization. Consistently delivers high-quality, maintainable solutions in Agile environments while mentoring developers and strengthening development best practices.

Professional Experience

Chaar Holdings – Developer/Back Office
March 2026 – Present

- Developed custom CLI tools to automate repetitive data entry for the online store and for processing price changes, reducing manual processing time by 75%.
- Developed multiple other custom CLI tools utilizing the PoS system's T-SQL database and the online store's GraphQL API to audit multiple aspects of both systems including prices and weights, products eligible to be removed for inactivity/discontinuation, tax code status, and missing products on the online store.

Andesa Services – Systems Engineer
September 2024 – October 2025

- Architectured and deployed backend systems for large-scale insurance and financial software platforms.
- Maintained and developed data warehousing systems for Life Insurance information.
- Led technical design reviews, ensuring best practices for maintainability and scalability.
- Ensured systems meet security and compliance needs to reduce risks.
- Mentored junior developers and improved team productivity through code reviews and pair programming.

Andesa Services – Systems Developer
February 2020 – September 2024

- Developed and deployed RESTful APIs and backend services in Java, Python, and VB.NET, improving performance and integration capabilities.
- Maintained and developed data warehousing systems for Life Insurance information.
- Optimized and created SQL queries and database structures.
- Designed and optimized SQL-based reporting tools and automated Crystal Reports for enterprise clients.
- Collaborated with cross-functional teams to deliver features that improved client efficiency and reduced manual workflows.

SRC Solutions – Software Developer
October 2016 – October 2019

- Built and maintained web applications using C# to support a School Choice Lottery platform.
- Managed SQL database including optimizing and creating SQL queries and database structures, and handling regular backups.
- Enhanced user experience through back-end improvements and integration of new functionality.
- Partnered with QA and support teams to reduce customer-reported bugs.

Education

DeSales University – B.A. in Computer Science (2011-2015)
Boston University – M.S. in Computer Science & Artificial Intelligence (2026-Present)

Technical Skills

- Languages & Frameworks: Java, JavaScript, TypeScript, C++, C#, Python, Lua, VB, Spring Framework, Spring Boot, Batch & PowerShell Scripting, HTML, Astro, CSS, WildFly
- Databases & Reporting: MySQL, Oracle SQL, T-SQL, PL/SQL, GraphQL, Crystal Reports, Logi Reports, SSMS
- AI: Cursor
- Version Control & CI/CD: Git, SVN, Jenkins
- Development Practices: Agile/Scrum, Test-Driven Development (TDD), Code Reviews, Data Warehousing
- Other Technologies: MS Office, Jira, Confluence, Asana, IIS, Telerik
- Soft Skills: Public Speaking, Mentorship, Technical Leadership

Additional Achievements

- **Eagle Scout** – Recognized for leadership, project management, and community service.
